There are 454 grams in a pound.) – give the energy in several units: the Calorie, the calorie, the watt-hour, and the kilowatt-hour. The unit you might feel most familiar with is the Calorie. That's the

famous "food calorie" used in dieting. It is the one that appears on the labels of food packages.

## 1. Energy and Power

Introduction to Energy "You can't compare apples and oranges," the old saying goes. That holds true for energy sources. We buy gasoline in gallons, wood in cords, and natural gas in cubic feet. How can we compare them? With British thermal units (Btu), that's how. The energy contained in gasoline, wood, or other
