Poverty and Environmental Degradation: a Literature Review and Analysis Anantha Duraiappah CREED Working Paper Series No 8 October 1996 International Institute for Environment and Development, London

### **Poverty and Environmental Degradation: a Literature Review**

This paper presents results from a comparative analysis of environmental income from approximately 8000 households in 24 developing countries collected by research partners in CIFOR's Poverty Environment Network (PEN).

### **Environmental Income and Rural Livelihoods: A Global**

The ecological footprint measures human demand on nature, i.e., the quantity of nature it takes to support people or an economy. It tracks this demand through an ecological accounting system. The accounts contrast the biologically productive area people use for their consumption to the biologically productive area available within a region or the world (biocapacity, the productive area that ...

Environmental vegetarianism is the practice of vegetarianism or eating a plant-based diet based on the indications that animal-based industries are environmentally destructive or unsustainable. The primary environmental concerns with animal products are pollution—including greenhouse gas emissions (GHG)—deforestation, and the use of resources such as fossil fuels, water, and land.
