Flora of China. Illustrations (Book, 1999) [WorldCat.org]

Flora of China is a scientific publication aimed at describing the plants native to China. The project is a collaborative scientific effort to publish the first modern English-language account of the 31,000 species of vascular plants of China. This number includes about 8,000 species of medicinal and economically important plants and about 7,500 species of trees and shrubs.
