

fundamentals of ionic liquids pdf

Influence of the alkyl chain length on the physicochemical properties and biological activity in a homologous series of dichlorprop-based herbicidal ionic liquids

Journal of Molecular Liquids | ScienceDirect.com

In chemistry, an ionic compound is a chemical compound composed of ions held together by electrostatic forces termed ionic bonding. The compound is neutral overall, but consists of positively charged ions called cations and negatively charged ions called anions. These can be simple ions such as the sodium (Na^+) and chloride (Cl^-) in sodium chloride, or polyatomic species such as the ammonium ...

Solvation describes the interaction of solvent with dissolved molecules. Ionized and uncharged molecules interact strongly with solvent, and the strength and nature of this interaction influences many properties of the solute, including solubility, reactivity, and color, as well as influencing the properties of the solvent such as the viscosity and density.

Distinct Binding of Rhenium Catalysts on Nanostructured and Single-Crystalline TiO_2 Surfaces Revealed by Two-Dimensional Sum Frequency Generation Spectroscopy

The Journal of Physical Chemistry C (ACS Publications)

The need for unconventional sources of fresh water is pushing a fast development of desalination technologies, which proved to be able to face and solve the problem of water scarcity in many dry areas of the planet.

Electrodialysis for water desalination: A critical
