### **PERSONALIZED MEDICINE BY THE NUMBERS**

Medical genetics is the branch of medicine that involves the diagnosis and management of hereditary disorders. Medical genetics differs from human genetics in that human genetics is a field of scientific research that may or may not apply to medicine, while medical genetics refers to the application of genetics to medical care. For example, research on the causes and inheritance of genetic ...

### **THE CASE FOR PERSONALIZED MEDICINE**

In personalized medicine. Personalized medicine is a medical method that targets treatment structures and medicinal decisions based on a patient's predicted response or risk of disease. The National Cancer Institute or NCI, an arm of the National Institutes of Health, lists a patient's genes, proteins, and environment as the primarily factors analyzed to prevent, diagnose, and treat disease ...
